

**Notice to Parents, Students, and Employees
of Northeast Baptist School**

In May of 2023, a comprehensive inspection was completed of all structures in the Northeast Baptist School facility for the purpose of locating and identifying “asbestos containing materials.” A management plan was developed for the facility to be kept on file on site.

A copy of the plan for the facility can be located in the principal’s office and is available for public inspection during regular school hours.

No asbestos containing materials was found at our facility.
